1 Document Overview

1.1 Introduction

This document serves as a software testing program for the mobile app of "IVORY". The purpose of this STP is to define the framework and strategy for examining IVORY's mobile app.

The program is tailored to support the Agile Scrum methodology, with an emphasis on flexibility and iterative development.

Our goal is to verify the high quality of IVORY's mobile app.

We will ensure that IVORY's mobile app behaves as expected by testing its features and functionality.

In accordance with Scrum principles, this document will try to remain brief and focused on test needs, so that it can be easily updated and developed during project iterations.

1.2 Objectives

At a high level, the main objectives of this software testing program for "IVORY" are as follows:

Ensure Product Quality:

To uphold the high standards of quality in which "IVORY" is known ensures that all features work as intended and meet the user and business requirements.

Enable Efficient Development Cycles:

To match the test activities with Scrum sprints, facilitate quick detection and resolution of defects, and support the development team in quick iterations.

Support Business Goals:

To ensure that the review process aligns with the visible business objectives, contributing to the continued success and growth of "IVORY"

1.3 Scope

The scope of this document is only for the mobile version app "IVORY"

This STP will not include test planning and test execution of "IVORY" in the following operating system: WEB

2 Scope of testing

2.1 Features to be tested

Here you can specify all the modules you plan to check out.

- Search Bar
- Sign in/Register
- Shopping cart
- Integration with Facebook, TikTok, Instagram, Whatsapp, Waze, Telegram, Youtube
- Main Menu

2.2 Features not to be tested

- Accessibility

2.3 Testing Types

The following are the types of tests that will be performed and planned during this project:

Functionality Verification:

To ensure all the features of IVORY such as performing a search, filters, work as planned

Usability Assessment:

To evaluate the user interface for intuitive, easy to use

This includes ensuring that the search bar is easily navigated and that the interface components respond to user interactions.

Localization and Internationalization Verification:

To ensure that "IVORY" provides accurate results and a user-friendly experience in different regions.

Search Result Accuracy:

To verify the relevance and accuracy of search results provided by search algorithms.

Includes checking the effectiveness of filters and ranking search results.

Smoke Testing

- The IVORY website is working properly
- Look for the product
- Add a product to the shopping cart
- Buy a product
- Sign up for "IVORY"
- Add a payment method

2.4 Test Strategy and Approach

Our review approach is systematic and structured to ensure thorough and effective verification of any structure received from the development team.

The following outlines our planned test progress for each release cycle:

Initial Build Assessment with Smoke Testing:

This package is designed to quickly check structure stability and ensure that the main functions of search work as expected.

Only after the building passes the smoke test will it progress through the testing process.

Focused Testing on New Features and Bug Fixes with Sanity Testing:

Once the construction has passed the smoke test phase, the QA team will continue to test for sanity.

This step is for the new features and bug fixes included in the release.

The goal is to ensure that specific updates work correctly in the application without immediate problems.

Incorporation of Exploratory Testing:

In parallel with the built-in test stages, we allocate about 20% of the entire test effort during the test execution phase.

This approach allows testers to go beyond predefined test cases and scenarios, using their insights and experience to uncover topics that may not have been anticipated in the testing planning stages.

Iterative Feedback and Continuous Integration:

The test strategy is aligned with the Agile Scrum framework, which supports continuous integration and iterative feedback.

The test steps will be well integrated with sprint cycles, ensuring immediate feedback to the development team and enabling quick iteration and refinement of the application.

The proposed testing approach ensures a balance between structured testing and the flexibility to discover unexpected problems, making it highly effective in the Agile development environment.

By following this approach, the QA team contributes to the delivery of a stable and quality product that meets the expected stringent standards of search.

ID I was looking for a brand headset "Jabra"
And give options to anything that has to do with the word I wrote

Actual result:

He doesn't know what I mean and doesn't give any results

Severity: What's the severity of the bug?

Low, **medium**, high,

Priority: What is the urgency of fixing the bug?

Usually, the president decides.

Low, **medium**, high

Bug No. 2

Title:

In search of well-known brand registrants without selecting the category that offers me, clicking Search does not give results

Description:

Who is registered in search of the brand "Asus" without choosing the category that offers me does not give results

Steps to recover the bug:

1. IVORY will enter the app
2. Click the search bar
3. List in search of the word "Asus" Click to search without selecting the categories that are offered to you

Expected result:

This will bring all the results related to the word "Asus"

Actual result:

He's not showing any results

Severity

Low, **medium**, high,

Priority: What is the urgency of fixing the bug?

Usually, the president decides.

Low, **medium**, high

Bug No.3

Title:

Clicking the Niue button through Waze is not showing me the correct address of the branch

Description:

Choosing the gay for branches through Waze is not showing me the address of the branch in Waze

Steps to recover the bug:

IVORY will enter the app .1
press the branch button .2
Select from the room branch list.3
.Press the "Navigate with Waze" button .4
Press the button to open the waze .5

Expected result:

The Waze app opens and shows me where I am and shows me the address of the store in her room to get there

Actual result:

In practice, this opens the app to me, showing me that I am currently in Lebanon and not showing me the address of the store in Hadera

Severity:

Low, **medium**, high,

Priority:

Low, **medium**, high

Bug No:4

Title:

The main menu has a "מעבר לאתר הרגיל" menu does not take me to the usual site

Description:

The main menu has a "מעבר לאתר הרגיל" button that does not take me to the usual site

Steps to recover the bug:

1. IVORY will enter the app
2. Press "Menu" on the right
3. Click on "Go to the Normal Site"

Expected result:

I'm going to the usual site

Actual result:

It does not take me to the usual site but takes me back to the main page of the app

Severity:

Low, medium, high,

Priority:

Low, medium, high

Bug No: 5

Title:

Using a YouTube button moves to a window that cannot be returned. Forced to close the app

Description:

Pushing a YouTube button opens a YouTube site on an app's website that can't go back to IVORY's app forced to close the app

Steps to recover the bug:

- Enter IVORY into the app
2. Press "Menu" on the right
3. "YouTube" will go down the bottom and click on the logo

Expected result:

A new window opens and gives an option to open "YouTube" through the "YouTube" app installed on the phone or that will open the YouTube page in safari

Actual result:

In practice, this moves me to a new YouTube page does not offer me to open the app

Severity:

Low, medium, high,

Priority:

Low, medium, high

Bug No: 6

Title:

You don't have to buy one product in 10 units

Description:

Do not give to buy one product in the amount of 10 units and do not show me how much there is in stock in the amount of a specific product

Steps to recover the bug:

- 1.IVORY will enter the app
 2. In search you will write "iphone 15 512Gb"
 - 3.Click on the first device that results
 - 4.Select 10 units
 - 5.Go down the bottom and press the "Add to Basket" button
 - 6.Click on "Shopping Basket"
- Press 7 to continue
- 8.In window 2 "Select mode of delivery" "Pick up from the branch" write "Hadera Mix" and press continue in the window of "Pick up from the branch"

Expected result:

A new window opens to enter "Invite Details - Buy as Guest"

In practice this does not allow me to buy the amount of devices showing me an error

Actual result:

A new window opens to enter "Invite Details - Buy as Guest"

In practice this does not allow me to buy the amount of devices showing me an error

Severity:

Low, medium, high,

Priority:

Low, medium, high

Software Test Report

Software test report for IVORY MOBILE app

Author: Maxim Gluzman

Date: 21\01\24

1. Test Summary

1.1 Scope of Testing:

The main goal is to ensure the functionality, usability and compliance of the “IVORY” mobile app

This included testing the following main Modules:

A test rule of the following major modules:

- Client Account Management Features,
 - payment of accounts,
 - Looking for products
 - User interface experience
-
- Modules designed to be tested but not
 - GUI
 - Accessibility
 - Security

1.2 Testing Period:

The test was conducted on one sprint, which lasted three weeks [21\01\24] to [05\02\24].

1.3 Testing Environment:

*The tests were carried out in the “test environment” of the mobile app
The tests were performed on mobile platforms in the IOS version*

1.4 High-Level Results:

*There were 30 cases of testing:
With 25 successes, 5 fail.*

2. Testing Activities

The Inspection Activities section lists the systematic and comprehensive

An approach to evaluate the functionality and user experience of the IVORY mobile app

This stage included a series of targeted test types designed to Carefully evaluate every aspect of the mobile app, ensuring reliability and quality

From the user's point of view.

The following tests were performed in this sprint:

2.1 Smoke Tests

During the Sprint we found no critical bug that caused us to stop the smoke test.

2.3 Functional Testing

All the functional tests were conducted, and all this was confirmed Features and modules work as planned, except for 5 open bugs that are classified as a "low-medium" priority.

These bugs are now actively being treated by development Team.

2.4 User Interface Testing

Our user interface check has confirmed the overall user experience They meet the high standards of our society.

2.5 Exploratory Testing

100% of our testing efforts have been devoted to research Testing. No major bugs were found in this process.

2.6 Compatibility Testing

During our compatibility check, 0 critical issues appeared.
